Important

Before using this guide you will need to have a Nochex account, if you haven't already signed up click the following link and choose between either a Seller or a Merchant account:

<https://www.nochex.com/gb/merchant-services/>

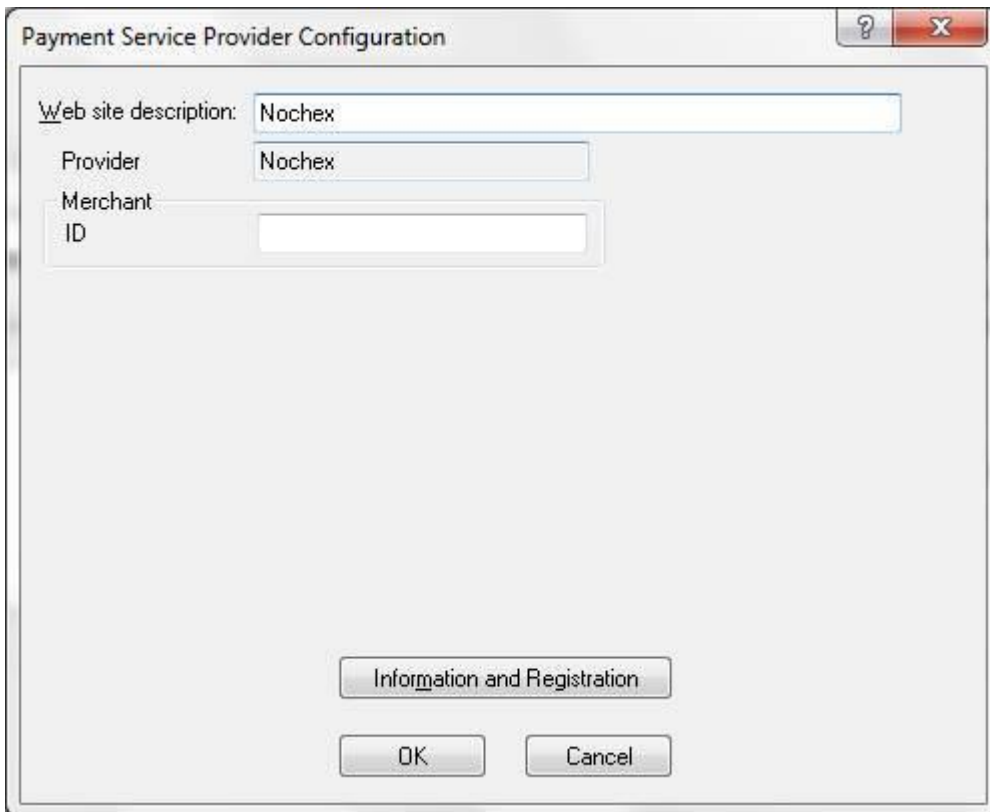

Introduction

Introduction

Nochex is already integrated into Actinic Desktop v11 but payment module is not readily available like some of the other payment methods. So Nochex has to be added as an extra payment option. This guide assumes that you have already successfully installed Actinic Desktop v11 and have the Nochex payment option available for configuration.

Installation Instructions

1. Choose 'Business Settings' from the Actinic 'Settings' menu.
2. Select the 'Payment and Security' tab, then click '+' next to Payment Method to add a new payment option.
3. Enter the settings for your Nochex account provided by Nochex during the sign up process. Click 'OK', then 'OK' again.

The screenshot shows a dialog box titled "Payment Service Provider Configuration". It has a standard Windows-style title bar with a question mark icon and a close button (X). The dialog contains three text input fields. The first field is labeled "Web site description:" and contains the text "Nochex". The second field is labeled "Provider" and also contains "Nochex". The third field is labeled "Merchant ID" and is currently empty. At the bottom of the dialog, there are three buttons: "Information and Registration", "OK", and "Cancel".

4. Update your web site, and Nochex will now be available as a payment option for your customers.
5. Finally it is recommended to complete a test transaction in order to check that APC is working. If APC has been successful you will receive an email from Nochex showing the APC result and the order status will be updated to Confirmed.
